Stan Editions®

Designed for you to be creative

Stan Editions was founded in 2021 by Stan Verstraete as a creative platform for art and design.

Stan Editions' first Candl Stacks collection is the result of a search for a new way of using candles. He found inspiration in the colors of Rothko, Mondrian and Sottsass. The unique modular nature of candles encourages creativity and allows anyone to build and rearrange the stacks as they please, creating sculptures perfectly suited to their mood, interior and personal world.

Next to that, the Module collection was born. A collection of individually packaged candles in colorful boxes. You can now build your "stack" from scratch, allowing you to be even more creative and build a stack to your liking.

To make your stack even more timeless and luxurious, you can add an alabaster module. Alabaster is a natural stone from Italy with a transparent character that allows candlelight to shine through.

Stan Editions is always looking for ways to become more sustainable, which is why we've created the Stearin line. A vegan line of monochrome batteries for elegant, sustainable homes...
